Ref: Oil Spill Gulf of Mexico – a technical proposal to stop the catastrophe

Dear Mr. President,

as member of the Foundation Prince Albert II de Monaco, I am pleased to present to you our Project of Technical Solution, together with my partner company Montanes G.m.b.H., Karlsruhe, Germany, specialized in Geological Sciences, as well as with partners of construction, marine engineering and geology, to stop the oil outflow into the sea of the Gulf of Mexico.

A too long period of time has passed in the meantime by non professional trials to stop the oil flow, destroying the marine fauna and coast environment.

Please find enclosed our letter to B.P. London and the Technical Draft for your information.

Knowing that you and your Government are aware of the above catastrophic happening to the biodiversity and alarming environment situation of the marine life at the Gulf of Mexico, I would appreciate your help and take action.

Sincerely

Dipl.-Ing., Phys. Edmond D. Krecké  
Honorary President of TSW Terra-Sol International  
Association of Science and Economy e.g.V.
